

Smart Device

A smart device as the name suggests, is an electronic gadget that is able to connect share and interact with its user and other smart devices. Although usually small in size, smart devices typically have the computing power of a few gigabytes. smart devices are interactive electronic gadgets that understand simple commands sent by users, and help in daily activities. Some of the most commonly used smart devices are smartphones, tablets, phablets, smartwatches, smart glasses and other personal electronics. While many smart devices are small, portable personal electronics, they are in fact defined by their ability to connect to a network to share and interact remotely. Many TV sets and refrigerators are also therefore considered

Smart devices.

Drug Addiction

Drug Addiction is one of the serious problems of the present times. The narcotics like heroin, hashish and brown-sugar are commonly called drugs and young men and women either take these drugs orally or inhale their smoke.

Sociologist says that drug-addiction is an addiction which came to India and other oriental countries from the western-countries. The Indians are opening the west and becoming drug-addicts. In the modern society there are several family problems. The lack of love and affection forces youths to get addicted to drugs. Sometimes the pressure of addicted friends tempts the youth

to become an addict.

Psychologists say that drugs help the addict to escape from the strains and problem of the world. But they damage the nervous system tremendously and shatter the mental make-up of the addicts. It even causes death.

Drug-addicts must be treated with love and kindness. The society should take strong measures to control the dishonest businessmen and drug-traffickers. There are laws of drug control all over the world, yet drug-addiction is increasing gradually. What is needed is an anti-drugs consciousness among the youth of the different countries.

Internet

Internet is the latest medium of communication. This is a speedy transmitting system of information with the help of computers and computer network. Internet is now regarded as a milestone of the modern world of communication. It is in fact a network of communication. In Bangladesh internet has opened a new dimension in our communication system. Both BTTB and the our government have taken active initiatives for its better implementation in our country. The use of internet in our country is still limited and costly. Modern age is the age of information. Information is stored and we find

them through Internet. Now the world of Commerce has been changed by it. Internet based e-commerce has become most popular to many customers as they can buy or choose anything without going to a market. Educational institutions are also taking its advantages. Many students are communicating with their teachers, libraries and among themselves with the help of Internet in the shortest possible time. Those days are not so far when every student will have access to Internet takes its maximum benefits.

social media

Now a day, social media has been very popular among every one. It is the best medium to reach or share our feeling, problems, issues, thought, news events as well as photos or videos to friends and followers. Social media is not only confined to you and me but also to politicians as well. Through different activities of politics our politicians are going to connect their people. This has been social media into limelight in India. From previous two elections the role of social media has been very important as the party which has reached more activities and issues on these social media

sites has won the elections. Regarding to this it can be said that social media has made conscious people as well as increased the responsibilities. All social sites like Facebook, twitter, google+ and linkedin also provide a platform for discussion on any current issues. The role of social media in business and consumer market cannot be ignored. It has changed the consumer behaviour of dealing. It has also provided many jobs in social sites. social media is really important and admirable.

Green Technology

Clean technology as it will be referred to by others is something that is being talked about in the world today. It is all about using the learned science and knowledge to create clean and real solutions to the problems in the world. It has been tried in many fields and is a fascinating field to research on. In the recent past there has been a lot of talk about the green city in Qatar that was being designed to be constructed to host the world cup. This is being aimed at creating a solution to the adverse weather conditions that are experienced in that region that hinder activities like world cup from being held there.

Green technology provides a solution to
save the earth from the activities of
human being that degrade it.

Environmental pollution

All our surroundings including air, water, soil, trees and animals make up our environment. When the normal relations among these elements of nature are disturbed, the ecological balance is hampered and it is called environmental pollution.

Environment is polluted by way of pollution of the factors that constitute it. Air pollution, water pollution, sound pollution and odour pollution together with deforestation are the main conditions that pollute environment.

The impact of environment pollution is very dangerous. The smoke from factories and other vehicles contains harmful substances like carbon-monoxide and sulfur-di-oxide. These hamper the cleanliness of the air.

Mills and factories set up on river banks let out chemical wastes in to the river water. These poisonous substances are destroying the plants and aquatic life. Pesticides and chemical fertilizers used in agriculture are also polluting water. When people drink this water or take a bath in the polluted water, they are attacked with stomach and skin diseases. Environmental pollution may be controlled by taking different measures. We may increase afforestation. If trees are planted in large numbers, we can be benefited in different ways. Trees also increase rainfall and prevent air pollution. Moreover, every conscious individual and institution should come forward to solve this problem for the sake of our existence.

Effects of mobile phone

The mobile phone is one of the greatest invention in 20th century. we can not imagine how is our life without the mobile phone. It is an obvious truth that the mobile phone gives us benefits in some aspects of life. Using mobile phone distributes our communication to make it easier than before. Besides a mobile phone can provide us with a lot of functions like relaxing, with music, chatting or playing games. However today people especially young people are becoming addicted to using the mobile phone. They can not stay away from their phones, even for a minute. Perhaps, because of the benefits of the mobile phones, most people.
